

The management of the Kazan province's industry in the Soviet Russia during 1917-1921 years: Analysis of systemic reforms in the economics

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

© 2018. The establishment of the Bolshevik regime in Russia can be considered by us as the succession of events involving the search for the best possible ways of managing the economics, aimed at the formation of sustainable economic growth. The aim of the given research is studying of the peculiarities of the establishment of the workers' control authorities and factory committees on the premises of the Kazan province in 1917-1921 years. The review of the organizational changes in the management system during the post revolutionary period shows us some accomplishments of the Soviet regime.

Keywords

Management of the Kazan province's industry, Reforms, The economic growth, The workers' control authorities
